

CBSE Class 10 History Subjective Question Chapter - 4 The Age Of Industrialisation

CBSE Class 10 History Subjective

CBSE Class 10 History Subjective Question Chapter – 4 The Age Of Industrialisation

## SHORT ANSWER QUESTIONS

**1. How was cloth manufactured in England during the proto-industrial period?**

**Ans. Merchants were based in towns but the work was done mostly in the countryside.**

(i) A merchant clothier in England purchased wool from a wool stapler

(ii) From there, it was carried to the spinners, then spun yarn was taken to the fullers and then to the dyers.

(iii) The finishing was done in London before the export merchant sold the cloth in the international market.

**2. Why was the steam engine slow to be accepted by industries ?**

**Ans.** (i) James Watt improved the steam engine and patented the new engine. His industrialist friend, Mathew Boulton manufactured the new model.

(ii) But for years he could find no buyers.

(iii) Steam engines were used in cotton and wool industries, mining, canal and iron works.

(iv) Steam engines were not used in any of the other industries till much later in the century. So, even the most powerful new technology that enhanced the productivity of labour manifold was slow to be accepted by industrialists.

**3. How was infrastructure developed after the 1840s?**

**Ans.** Building activity intensified in the cities, opening up greater opportunities of employment.

(i) Roads were widened.

(ii) New railway stations came up.

(iii) Railway lines were extended, and tunnels dug up.

(iv) Drainage and sewers were laid.

(v) Rivers were embanked, and

(vi) Number of workers in the transport industry doubled.

**4. How did the British establish a monopoly in cotton and silk trade?**

**OR**

**What steps were taken by East India Company to control the market of cotton and silk goods?**

**Ans.** (i) The company eliminated the existing traders and brokers to establish direct control over weavers. It appointed a paid servant called Gomasthas to

supervise weavers, collect suppliers and examine the quality of cloth.

(ii) It prevented company weavers from dealing with other buyers. Once an order was placed. the weavers were given loans to purchase the raw material. Those who took loans had to hand over the cloth they produced to the Gomasthas only. They could not take it to any other trader.

**5. Why was the 'Jobber' employed by Indian industrialists?**

**Ans.** (i) Industrialists employed the Jobber, an old trusted worker.

(ii) He got people from his village, got them jobs and helped them settle in the cities. (iii) Jobbers therefore, became persons with authority and power. He began demanding Money and gifts for the favour he did and started controlling the lives of the workers.

**6. How did the 'fly shuttle help in improving the handloom production?**

**Ans.** (i) Fly shuttle was a mechanical device used for faster weaving.

(ii) By the second decade of the 20th century, weavers were using looms with the fly shuttle

(iii) It increased productivity per worker, speeded up production and reduced labour demand

**7. How did the small-scale industries predominate in India?**

**Ans. While factory industries grew steadily after the war, large industries formed a small segment of the economy. Most of them were located in Bengal and Bombay.**

(i) Over the rest of the country, small-scale production continued to predominate.

(ii) In some instances, handicrafts production actually expanded in the 20th century.

(iii) While cheap machine-made thread wiped out the spinning industry in the 19th century handloom cloth production survived, despite problems.

**8. Why was the industrial growth slow till the First World War ?**

**Ans.** (i) The war created a dramatically new situation, with the British mills busy with war production to meet the needs of the army.

(ii) Manchester imports into India declined. Indian mills had a vast home market to supply.

(iii) As the war continued, Indian factories were called upon to supply war needs like jute bags, cloth for uniform, boots, etc.

**9. Why could Manchester never recapture its old position in the Indian market after the war?**

**Ans.** (i) Unable to modernise and compete with the US, Germany and Japan, the economy of Britain crumbled after the war.

(ii) Cotton production collapsed and exports of cotton cloth from Britain fell dramatically.

(iii) Within the colonies, local industrialists gradually consolidated their position substituting foreign manufacturers and capturing the home market.

**10. What was the condition of the weavers in surviving the famines and competition?**

**OR**

**How could certain groups of weavers survive the competition with mill industries ?**

**OR**

**How could you say that famines did not affect the sale of Banarasi or Baluchari saris?**

**Ans.** (i) Amongst weavers, some produced coarse cloth while others finer cloth.

(ii) The coarse cloth was bought by the poor and its demand fluctuated.

(iii) In times of bad harvests and famines, rural poor could not possibly buy the cloth.

(iv) But the rich could buy this finer cloth, when the poor starved. So, famines did not affect the sale of Banarasi or Baluchari saris.

These weavers lived tough lives and worked for long durations. Very often, the entire family including women and children had to work to survive.

**11. What does the picture indicate on the famous book 'Dawn of the Century'?**

**Ans.** (i) There is an angel of progress, bearing the flag of the new century, and is gently perched on a wheel with wings, symbolising time.

(ii) The flight is taking her into the future.

(iii) floating about, behind her, are the signs of progress-railway, camera, machines, printing press and factory.

**12. Why there were clashes between gomasthas and weavers?**

**OR**

**The establishment of political power by the East India Company resulted in ruination of the Indian weavers". Support the statement with suitable examples.**

**Ans.** (i) Earlier, supply merchants belonged to the same village and looked after the needs of weavers.

(ii) The new 'gomasthas' were outsiders, with no social links with villagers.

(iii) They acted arrogantly and sometimes punished weavers for delay in supply.

(iv) Prices received from the company were miserably low.

(v) Loans tied them to the British company.

(vi) In many places, weavers deserted villages and migrated to other places for setting up their own looms.

**14. How did factories emerge on the landscape of England ?**

**Ans.** (i) In the early 19th century, factories increasingly became an intimate part of English landscape.

(ii) The new mills were so magical that the sight of those factories or developing new technology dazzled the people.

(iii) They concentrated their attention on the mills, almost forgetting the by-lanes and the workshops where production still continued.

**15. Who improved the steam engine? Who manufactured the new model ?**

**Ans.** (i) James Watt improved the steam engine produced by Newcomen and patented the new engine in 1781.

(ii) His industrialist friend Mathew Boulton, manufactured the new model.

**16. Name the entrepreneurs or industrialists of India.**

**Ans. (i) In Bengal:** Dwarkanath Tagore

**(ii) In Bombay:** Dinshaw Petit, Jamsetjee Nusserwanjee Tata

**(iii) In Calcutta:** Seth Hukumchand and G.D. Birla

**17. Name the European Managing agencies which controlled a large sector of Indian industries after the First World War.**

**Ans.** The Three of the biggest agencies were:

(i) Bird Heiglers & Co.

(ii) Andrew Yule

(iii) Jardine Skinner & Co.

**18. Who was a jobber?**

**Ans.** Very often the jobber was employed by industrialists to get new recruits. He used to be an old trusted worker. He got people from his village, ensured them jobs, helped them settle in the city and provided them money in time of crisis.

**19. Why is this period called as 'Age of Industries'?**

**Ans.** The age of industries meant:

(i) Major technological changes

(ii) Growth of factories

(iii) Making of a new industrial labour force.

**20. What was the Proto-industrialisation? Explain its importance.**

**Ans.** Even before factories began to appear on the landscape of England and Europe, there was large scale industrial production for an international market. This was not based on factories. Many historians refer this phase as "Proto Industrialisation". During this period, most of the goods were manufactured by trained craftspersons for the international market.

(i) The Proto-Industrial system was a part of a network of commercial exchanges.

(ii) It was controlled by merchants and the goods were produced by a vast number of producers working within their family farms, not in factories.

(iii) At each stage of production 20 to 25 workers were employed by each merchant. This meant that each clothier was controlling hundreds of workers.

**21. "Although wages increased somewhat in the 19th century, yet they could not improve the wealfare of the workers. How far do you agree with the statement? Explain any two points,**

**Ans.** (i) Although wages increased somewhat in the 19th century, yet they could not improve the welfare of the workers.

(ii) Actually due to prices which rose during Napoleonic war, due to inflation it hardly affected the improved wages of workers.

(iii) During war period, unemployment also existed, so there was more need of employment than the wages.

## LONG ANSWER QUESHONS

**1. How did factories in England multiply in the late 18th century?**

**Ans.** (i) British cotton industries boomed in the late 18th century.

(ii) A series of inventions in the 18th century increased the production process.

(iii) Processes of carding, twisting, spinning, and rolling were made faster.

(iv) Richard Arkwright created the cotton mill. Now the costly new machines could be purchased, set up and maintained in the mill.

(v) Within the mill, all the processes were brought together under one roof and management.

(vi) This allowed a more careful supervision over the production process, a watch over quality and the regulation of labour, all of which had been difficult to do when production took place in the countryside.

**2. "Series of changes affected the pattern of industrialisation in India by the early 20th Century." Analyze the statement.**

**Ans. Series of changes affected the pattern:**

(i) As the Swadeshi Movement gathered, momentum nationalists mobilised people to boycott foreign cloth.

(ii) Industrial groups organized themselves to protect their collective interest.

(iii) Pressurizing the government to increase tariff protection and grant other concessions.

(iv) The export of Indian yarn to China declined.

(v) Industrialists in India began shifting from yarn to cloth production.

(vi) Cotton piece goods production in India doubled between 1900-1912.

Any other relevant point.

(Any five points to be explained)

**3. How rapid was the process of industrialisation in Britain?**

**Ans.** (i) The most dynamic industries in Britain were cotton and metal. Cotton was the leading sector. With the expansion of railways in England and its colonies, the demand for iron and steel increased rapidly.

(ii) The new industries could not easily displace traditional industries. Textiles was a dynamic sector, but a large portion of the output was produced within factories, but outside, within domestic units.

(iii) The pace of change in the traditional industries was not set by steam powered cotton or metal industries. Ordinary and small innovations were the basis of growth in many non-mechanised sectors such as food processing, building, pottery, glass work, etc.

(iv) Technological changes occurred slowly. New technology was expensive and merchants and industrialists were cautious about using it. The machines often broke down and repair was costly. They were not as effective as their investors claimed.

**4. What problems did the cotton weavers face in India?**

**Ans.** (i) Their export market collapsed.

(ii) Local market also shrank as it was flooded with Manchester imports.

(iii) Produced by machines at lower costs, the imported cotton goods were so cheap that weavers could not easily compete with them.

(iv) By 1860, weavers could not get sufficient supply of raw cotton of good quality

(v) When American Civil War broke out and cotton supply from the US was cut off, Britain turned towards India.

(vi) As raw cotton exports from India increased, the price of raw cotton shot up.

**5. Why did industrialists in India begin shifting from yarn to cloth production:**

**Ans.** (i) When Indian businessmen began setting up industries; they avoided competing with Manchester goods in the Indian market.

(ii) Since yarn was not imported by British in India, early cotton mills in India started producing coarse cotton yarn rather than fabric.

(iii) The yarn produced in Indian spinning mills was used by handloom weavers in India and exported to China.

(iv) As the Swadeshi Movement began, nationalists told people to boycott foreign doth.

(v) Industrial groups organised themselves to protect their collective interests.

(vi) From 1906, the export of Indian yarn to China declined since produce from the Chinese and Japanese mills flooded the markets.

(vii) So industrialists in India began shifting from yarn to cloth production

(viii) Cotton piece goods production in India almost doubled between 1900 and 1912.

**6. How did the British market their goods in India?**

**Ans. (i) Advertisement of the product:** Advertisements make products appear desirable and necessary. They try to shape the minds of people and create new needs. During the Industrial age, advertisements played a major role in expanding the markets for produces

**(ii) Putting labels on the cloth bundles:** The label was needed to make the place of manufactures and the name of the company familiar to the buyers. When buyers saw "MADE IN MANCHESTER" written in bold on a label, they would feel confident about buying the cloth.

**(iii) Images of Indian Gods and Goddesses:** It was as if association with Gods gave divice approval to the goods being sold. Images of Krishna or Saraswati was intended to make the manufacture from a foreign land appear somewhat familiar to the Indian people.

**(iv) Printing calendars to popularise their products:** Unlike newspapers and magazines calendars were used even by people who could not read. They were hung in the tea shops and in poor people's homes, just as much as in offices and middle class houses.

**7. Describe the role of early entrepreneurs of India in the development of industries.**

**Ans. The Indian industrialists/entrepreneurs in 18th and 19th centuries:**

(i) Dwarakanath Tagore-He invested in shipping, shipbuilding, mining, banking, plantations and insurance in 1830's. These were his six joint-stock

companies. He traded with China also. But, his business sank along with those others in the wider business crisis of the 1840s

(ii) Parsis like Dinshaw Petit traded with many countries.

(iii) J.N. Tata who built huge industrial empires in India, accumulated their initial wealth party from exports to China, and partly from raw cotton shipments to England.

(iv) Seth Hukumchand and father and grandfather of G.D. Birla traded with China in 18th & 19 th centuries.

(v) Other Indian traders also traded.

(vi) Any other relevant point

To be assessed as a whole.

The Age of Industrialisation

**8. Why did merchants turn to countryside rather than setting up business in towns ?**

(i) Merchants supplied money to peasants and artisans, persuading them to produce for an international market.

(ii) Demand for goods increased since the European powers had acquired colonies and sold their goods in these colonies.

(iii) But merchants could not expand production within towns because the urban crafts and trade guilds were very powerful.

(iv) Rulers granted different guilds the monopoly rights to produce and trade in specific products.

It was, therefore, difficult for new merchants to set up business in towns. So, they turned to countryside.

**9. In what ways did the proto-industrial production help the poor farmers in countryside:**

**Ans.** (i) In the countryside, poor peasants and artisans began looking for merchants. This was a time when open fields were disappearing and common fields were closed.

(ii) Cottagers and poor peasants, who had earlier depended on common lands for their survival, had to now look for alternative sources of income.

(iii) Many had small land holdings, which could not provide work for all the members of the family.

(iv) So, merchants came around and offered advances to produce goods for them, peasants eagerly agreed

(v) By working for the merchants, they could remain in the countryside and continue to cultivate their small plots.

(vi) So, income from proto-industrialisation supplemented their shrinking income from cultivation and raised their standard of living.

**10. Till the first World War, industrial growth was slow'. Give reasons for this.**

**Ans.** (i) The war created a dramatically new situation, with the British mills busy with war production to meet the needs of the army.

(ii) Manchester imports into India declined. Indian mills had a vast home market to supply

(iii) As the war continued, Indian factories were called upon to supply war needs like jute bags. cloth for uniform, boots, etc.

(iv) Unable to modernise and compete with the US, Germany and Japan, the economy of Britain crumbled after the war.

(v) Cotton production collapsed and exports of cotton cloth from Britain fell dramatically.

(vi) Within the colonies, local industrialists gradually consolidated their position substituting foreign manufacturers and capturing the home market.
