Here we are providing **NCERT Solutions for Class 7** Social Science Our Enviroment Chapter – 01 Environment Solutions are important for Class 7 students as it is an extremely important class and is also a year in which students learn the fundamentals of concepts that help them lay a solid foundation for their higher education. The NCERT solutions provide extensive material to enable students to form a good foundation with the foundations of the NCERT Class 7 Social Science Our Enviroment Chapter – 01 Environment NCERT Solutions for Class 7 Social Science Our Enviroment Chapter – 01 Environment Improve your subject knowledge and solve multiple exam questions with ease by practicing regularly at NCERT Solutions. If You want class wise notes then **click here**

Exercise

1.

(A) What is an ecosystem?

The interaction or interdependence of plant, animal and human beings with their immediate environment or surroundings is called an ecosystem.

Ans-

The interaction or interdependence of plant, animal and human beings with their immediate environment surroundings is called as ecosystem.

(B) What do you mean by natural environment?

Ans-

The environment that consists of the elements created by nature is called the natural environment. The natural environment comprises land, water, air, plants, and animals.

(C) Which are the major components of the environment?

Ans-

The major components of the environment are:

a. Natural components: They consists of all objects created by nature such as plants, air, land and water.

b. Human components: They consists of human beings.

c. Human-made components: These include everything that is made by man or human such as buildings, parks and roads.

(D) Give four examples of human made environment.

Ans-

Human environment are those that include everything that is made by man or humans. Examples: Parks, buildings, roads and industries.

(E) What is lithosphere?

Ans-

Lithosphere or the domain of land is the solid crust or the outermost hard layer of the Earth. It is made up of rocks and minerals, and is covered by a thin layer of soil. It is an irregular surface with various landforms such as mountains, plateaus, plains and valleys.

(F) Which are the two major components of biotic environment?

Ans-

Biotic environment consists of all living things in an ecosystem. The two major components of biotic environment are plants and animals.

(G) What is biosphere?

Ans- Biosphere is the narrow zone of the Earth where land, water and air interact with each other to support life. It is also known as the living world that consists of both plant and animal kingdom.

2.

(A) Tick the correct Answer.

Which is not a natural ecosystem?

(a) Desert

(b) Aquarium

(c) Forest

Ans-

Aquarium is an artificial aquatic environment which is made by man.

(B) Tick the correct Answer.

Which is not a component of human environment?

(a) Land

(b) Religion

(c) Community

Ans- Land is the natural components whereas the other are human environment.

(C) Tick the correct Answer.

Which is a human made environment?

(a) Mountain

(b) Sea

(c) Road

Ans- Mountains and Sea are natural components of our environment.

(D) Tick the correct Answer.

Which is a threat to environment?

(a) Growing plant

(b) Growing population

(c) Growing crops

Ans- The rest of the options are part of environments and are useful.

3. Match the following.

(i) Biosphere	(a) blanket of air which surround the earth
(ii) Atmosphere	(b) domain of water
(iii) Hydrosphere	(c) gravitational force of the earth
(iv) Environment	(d) our surroundings
	(e) narrow zone where land water and air interact
	(f) relation between the organisms and their surroundings

Ans-

(i) Biosphere – (e) narrow zone where land water and air interact Biosphere is the zone where living components interact with each other as well as with the non-living environment. (ii) Atmosphere – (a) blanket of air which surrounds the earth Atmosphere is also called the blanket of air that surrounds the surface of the earth. It is made of different gases. (iii) Hydrosphere – (b) domain of water Hydrosphere is the abiotic component that comprises the water. (iv) Environment – (d) our surroundings Environment comprises almost everything around us. It includes the living components and non-living components such as plants, animals, nand air.

4.

(A) Give reasons

Man modifies his environment

Ans- Modification of environments means altering or changing the immediate surroundings. As the population is growing, human needs and desires are also growing. To fulfil the needs, humans or man modifies the environment in many ways. For example, trees are cut to make buildings or commercial places. Animals are killed for their skin and tusks.

(B) Give reasons Plants and animals depend on each other

Ans- Plants and animals depend on each other for many things such as food and shelter.

i. Plants make their own food by photosynthesis. They are consumed by animals as food because animals cannot make their food.

ii. Plants produce oxygen which is used by animals while breathing. In return, animals release carbon dioxide in the air which is used by plants to make food during photosynthesis.

iii. Plants provide shelter to animals such as monkeys and birds.

5. Imagine an ideal environment where you would love to live. Draw the picture of your ideal environment

Ans- I would like to live in an environment like shown:

Note: Answers may vary for this. Students may draw picture of an environment where there is greenery and pleasant atmospheric conditions.
