
Class 11 Chemistry Notes

Class 11 Chemistry Notes

Class 11 Chemistry Notes Chapter 1 Some Basic Concept of Chemistry. Notes chapter 1 Some Basic Concept of Chemistry contains all the topic as per the syllabus of NCERT. Each topic is explained in very easy language with coloured diagrams. Students can understand Typical topics easily step by step. **Class 11 chemistry notes** Chapter 1 Some Basic Concept of Chemistry is prepared by our experts as per the latest syllabus and exam pattern Class 11 chemistry. Calculation of problems is given in very simple ways after consulting from various books and expert teachers. Also, you can download Class 11 Notes of other Subjects like Chemistry, Mathematics Formulas sheets, Biology. Along with Notes, we are also providing chapters wise notes of class 11 all other subjects. After reading the Class 1 1chemistry Notes of Chapter 1 Some Basic Concept of Chemistry definitely you will get good marks in board exam Class 11 Chemistry Notes for Some Basic Concept of Chemistry. Each concept is explained in a detailed way class 11 notes chapter 1 Some Basic Concept of Chemistry make according to the Class 11th NCERT Chemistry book. Students can download pdf file and do study offline so that preparation of exam will be done in better in the bottom section pdf button given so that you have to click on it and can download coloured notes of class 12 chemistry notes chapter 1 solid state. Notes made according to NCERT Syllabus so that any student who studying in class 11 can read no matter which state you belong to even this notes can help to prepare for completive exam also.

Class 11 Chemistry Ch-1 Some Basic Concept Of Chemistry

1 . CLASSIFICATION OF UNIVERSE :

(1) Matter
(2) Energy

(1) MATTER

The thing which occupy space and having mass which is feel by our five senses is called as matter.

2 types

1. Physical classification
2. Chemical classification

(I) Physical Classification :

It is based on physical state under ordinary conditions of temperature and pressure, matter is classified into the following three types :

1. Solid
2. Liquid
3. Gas

(a) Solid :

A substance is said to be solid if it possesses a definite volume and a definite shape
e.g. sugar, iron, gold, wood etc.

(b) Liquid :

A substance is said to be liquid if it possesses a definite volume but not definite shape. They take up the shape of the vessel in which they are put.
e.g. water, milk, oil, mercury, alcohol etc.

(c) Gas :

A substance is said to be gas if it neither possesses a definite volume nor a definite shape. This is because they fill up the whole vessel in which they are put.
e.g. hydrogen(H_2), oxygen(O_2), carbon dioxide(CO_2), etc.'

(II) Chemical Classification :

2 Types

(A) Pure Substance
(B) Mixture

(A) Pure Substance :

A material containing only one type of substance. Pure Substance cannot be seperated into simpler substance by physical method.
