🌟 Introduction to the Chapter

In the previous chapter, we noted that the existence of social diversity does not threaten democracy. In this chapter, we apply this idea to the practice of democracy in India by looking at three kinds of social differences: gender, religion, and caste.

📌 Gender and Politics

- **Public/Private Division:** Society expects women to do all the work inside the home and men to do work outside the home. This translates to unequal political representation.
- **Patriarchy:** A system that values men more and gives them power over women. India is still a strongly patriarchal society.
- **Feminist Movements:** Radical women's movements aimed at equality in personal and family life as well in politics.

⚡ Religion, Communalism and Politics

- Unlike gender, religious differences are often expressed in the field of politics.
- **Communalism:** Happens when beliefs of one religion are presented as superior to those of other religions, and state power is used to establish domination.
- **Secular State:** The Indian Constitution declares India as a secular state. There is no official religion and the constitution prohibits discrimination on grounds of religion.

❌ Common Mistakes to Avoid

> [!WARNING]
>
> 1. **Caste System:** Remember that while laws have changed, caste has not disappeared from contemporary India. It still strongly dictates marriage and voting patterns.
> 2. **Secularism:** Secularism in India doesn't mean being anti-religion. It means the state respects all religions equally and does not favor one over another.

📝 Quick Revision

Caste and Politics

Caste is a unique societal division specific to India.

- **Caste in Politics:** When parties choose candidates, they keep in mind the caste composition of the electorate.
- **Politics in Caste:** It is not always politics that uses caste. Caste groups themselves also get influenced by politics and try to become bigger by incorporating neighboring castes.
- **Conclusion:** While social divisions based on gender, religion, and caste create significant friction, accommodating these differences in a healthy democratic manner is key to political stability.
