- Post category:Class 7 MCQs

Here we are providing **NCERT Class 7 Science MCQs Chapter –** 10 Respiration in Organisms, Chapter Wise MCQs for board exam is very important for board exam preparation. This book explains all the concepts and topics in very simple language that the students can easily understand the complex subjects also. This NCERT Class 7 Science MCQs Chapter – 10 Respiration in Organisms, Chapter consist all important topic regarding chapter 10 NCERT Class 7 Science MCQs Chapter – 10 Respiration in Organisms. This book basically covers all the major and minor elements that together form a democratic government. Topics like power-sharing, federalism, democracy and diversity, political parties, consequences of democracy, challenges to democracy etc. have been discussed in the NCERT Class 7 Science MCQs Chapter – 10 Respiration in Organisms. The question papers in CBSE board exams are generally based on the latest NCERT books. Hence, students must follow the NCERT book to prepare effectively for their Class 7 Science exam. 1.All organisms are made of small microscopic units which cannot be seen with the naked eyes, called

(A) animals

(B) cells

(C) tissues

(D) organs

Ans – (B)

2.Sometimes when we do heavy exercise, anaerobic respiration takes place in our muscle cells. What is produced during this process?

(A) alcohol and lactic acid

(B) alcohol and CO_2

(C) lactic acid and CO_2

(D) lactic acid only

Ans – (D)

3.A film of moisture of appears on the surface of the mirror when we:

(A) inhale

(B) exhale

(C) breathe

(D) none of these

Ans – (B)

4.Organisms get energy through

(A) food

(B) eating

(C) sleeping

(D) none of these

Ans – (A)

5.Yeast is used in wine and beer industries because it respires.

(A) aerobically producing oxygen

(B) aerobically producing alcohol

(C) anaerobically producing alcohol

(D) anaerobically producing CO_2

Ans – (C)

6.The vital biological process of organisms is:

(A) inspiration

(B) respiration

(C) transpiration

(D) evaporation

Ans – (B)

7.Cellular respiration is carried out in the

(A) cells

(B) organs

(C) tissues

(D) muscles

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

8.During the process of exhalation, the ribs move

(A) down and inwards

(B) up and inwards

(C) down and outwards

(D) up and outward

Ans – (A)

9.The mountaineers carry oxygen with them because:

(A) At an atitude of more than 5 km there is no air

(B) The amount of air available to a person is less than that available on the ground

(C) The temperature of air is higher than that on the ground

(D) The pressure of air is higher than that on the ground

Ans – (B)

10.Sometimes when we do heavy exercise, anaerobic respiration takes place in our muscle cells. What is produced during this process?

(A) alcohol and lactic acid

(B) alcohol and CO_2

(C) lactic acid and CO_2

(D) lactic acid only

Ans – (D)

11.Yeast is used in wine and beer industries because it respires.

(A) aerobically producing oxygen

(B) aerobically producing alcohol

(C) anaerobically producing alcohol

(D) anaerobically producing CO_2

Ans – (C)

12.During the process of exhalation, the ribs move

(A) down and inwards

(B) up and inwards

(C) down and outwards

(D) up and outward

Ans – (A)

13.Breathing is a process that

(i) provides O_2 to the body.

(ii) breaks down food to release energy.

(iii) helps the body to get rid of CO_2

(iv) produces water in the cells.

Which of the following gives the correct combination of functions of breathing?

(A) (i) and (ii)

(B) (ii) and (iii)

(C) (i) and (iii)

(D) (ii) and (iv)

Ans – (C)

14.The process of breakdown of food in the cell is known as

(A) breakdown process

(B) cellular respiration

(C) food breakdown

(D) none of these

Ans – (B)

15.We feel hungry after a physical activity because we need:

(A) oxygen

(B) energy

(C) food

(D) none of these

Ans – (B)

16.Which are the gases involved in breathing?

(A) O_2 and NO_2

(B) O_2 and SO_2

(C) O_2 and O_3

(D) O_2 and CO_2

Ans – (D)

(adsbygoogle = window.adsbygoogle || []).push({});

17.An example of aerobes is

(A) cat

(B) dog

(C) human being

(D) all of these

Ans – (D)

18.A person can hold air in the lungs is:

(A) 50 ml

(B) 5000 ml

(C) 500 ml

(D) 0.5 ml

Ans – (C)

19.Name the organ of the body in which the blood is oxygenated.

(A) Heart

(B) Lungs

(C) Lever

(D) Pancreas

Ans – (B)

20.When breakdown of glucose occurs with the use of oxygen, it is called

(A) anaerobic respiration

(B) aerobic respiration

(C) regular respiration

(D) all of these

Ans – (B)

21.After heavy exercise, due to the accumulation of which substance we get muscle cramps ?

(A) Malaic acid

(B) Fumaric acid

(C) Lipoic acid

(D) Lactic acid

Ans – (D)

22.The percentage of oxygen in exhaled air is:

(A) 14.4%

(B) 4.4%

(C) 16.4%

(D) 0.04%

Ans – (C)

23.Name the type of respiration which causes muscle cramps.

(A) Aerobic respiration

(B) Anaerobic respiration

(C) Both (A) and (b)

(D) None of these

Ans – (B)

24.Yeasts are used in

(A) wine and beer industry

(B) bakery

(C) in both

(D) none of these

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

25.Breathing rate in human beings in normal condition is

(A) 12-15 times in a minute

(B) 15-18 times in a minute

(C) 18-22 times in a minute

(D) 22-25 times in a minute

Ans – (B)

26.The percentage of oxygen in inhaled air is:

(A) 14.4%

(B) 4.4%

(C) 16.4%

(D) 21%

Ans – (D)

27.Name the term which means ‘taking in of air rich in oxygen into the body’.

(A) Exhalation

(B) Inhalation

(C) Breathing

(D) Respiration

Ans – (B)

28. Lime water turns milky due to the presence of which of the following gases?

(A) Carbon monoxide

(B) Carbon dioxide

(C) Nitrogen

(D) Oxygen

Ans – (B)

29.The percentage of CO_2 in inhaled air is:

(A) 0.04%

(B) 21%

(C) 16.4%

(D) 4.4%

Ans – (A)

30.Which gas is given out during exhalation?

(A) Oxygen

(B) Nitrogen

(C) Carbon dioxide

(D) All of these

Ans – (C)

31. Chest cavity is surrounded by

(A) 12 pair of ribs

(B) 10 pair of ribs

(C) 11 pair of ribs

(D) 25 ribs

Ans – (A)

32.The respiratory organs of human beings are:

(A) lungs and skin

(B) lungs

(C) gills

(D) skin

Ans – (B)

(adsbygoogle = window.adsbygoogle || []).push({});

33.The gills help the fish to

(A) take in oxygen from air

(B) take in oxygen dissolved in water

(C) absorb nutrients present in water

(D) release waste substance in water

Ans – (B)

34.The process of respiration leads to the release of energy in:

(A) plants

(B) animals

(C) human beings

(D) all of these

Ans – (A)

35.Yeast are used to make

(A) curd

(B) wine and beer

(C) bakery items

(D) both (B) and (c)

Ans – (D)

36.The absorb oxygen dissolved in water:

(A) frog

(B) fish

(C) earthworm

(D) butterfly

Ans – (B)

37.Earthworms breathe through

(A) skin

(B) legs

(C) trachea

(D) nose

Ans – (A)

38.The respiratory organ of birds are:

(A) mouth

(B) gills

(C) wet skin

(D) lungs

Ans – (D)

39.The organ through which fishes breathe is

(A) nose

(B) gills

(C) skin

(D) spiracles

Ans – (B)

40.Air exhaled:

(A) has no moisture

(B) has more amount of oxygen

(C) has moisture

(D) has less amount of carbon dioxide

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

41.In the cells, oxygen is used to break down glucose into

(A) carbon dioxide, water and energy

(B) fats

(C) alcohol, carbon dioxide and energy

(D) lactic acid, water and energy

Ans – (A)

42.After exercise:

(A) respiration rate increases

(B) respiration rate decreases

(C) respiration rate remains same

(D) none of these

Ans – (A)

43.Cockroaches breathe by using an organ called

(A) nose

(B) tracheae

(C) both (A) and (b)

(D) none of these

Ans – (B)

44.Air enters the lungs when:

(A) diaphragm is lowered

(B) diaphragm is pushed upwards

(C) diaphragm remains at its place

(D) none of these

Ans – (A)

45.The most common substrate for respiration is

(A) fats

(B) amino acids

(C) glucose

(D) sucrose

Ans – (C)

46.Roots take up air from the air spaces present between the:

(A) root hair

(B) soil particles

(C) both (A) and (b)

(D) none of these

Ans – (B)

47.Organism which respires in the absences of oxygen is called a/an

(A) microbe

(B) anaerobe

(C) aerobic

(D) none of these

Ans – (B)

48.If a potted plant is over watered, the roots will:

(A) grow

(B) die

(C) dry

(D) none of these

Ans – (B)

49.During inspiration or inhalation, in lungs

(A) volume decreases, pressure increases

(B) volume increases, pressure decreases

(C) volume decreases, pressure decreases

(D) volume increases, pressure increases

Ans – (B)

50.The rate of exchange of gases in plants is not as fast as in:

(A) animals

(B) insects

(C) birds

(D) human beings

Ans – (A)

51.Insects have a special network of tubes called

(A) tracheae

(B) gills

(C) spiracles

(D) lungs

Ans – (A)

52.Insects have small openings on the outside of their bodies. These openings are called:

(A) spiracles

(B) trachea

(C) gills

(D) none of these

Ans – (A)

53.The major source of oxygen for the aquatic animals is

(A) atmosphere

(B) water

(C) soil

(D) none of these

Ans – (C)

54.Exchange of gases take place through small openings on the surface of the leaves are called:

(A) spiracles

(B) stomata

(C) trachea

(D) none of these

Ans – (B)

55.Primary organ of human respiratory system is

(A) lung

(B) liver

(C) heart

(D) pharynx

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

56.The process of intake of oxygen and exhalation of carbon dioxide is:

(A) breathing rate

(B) breathing

(C) respiration

(D) none of these

Ans – (B)

57.When breakdown of glucose occurs in the presence of oxygen, the respiration is called

(A) anaerobic

(B) microbe

(C) aerobic

(D) none of these

Ans – (C)

58.Ribs move down and inward to decrease space in chess cavity during:

(A) inhalation

(B) exhalation

(C) respiration

(D) transportation

Ans – (B)

59.The tracheal tubes have openings called

(A) trachea

(B) gills

(C) lungs

(D) spiracles

Ans – (D)

60.In Cockroaches air enters the body through:

(A) lungs

(B) gills

(C) spiracles

(D) skin

Ans – (C)

61.The process of breakdown of food in the cell with the release of energy is called

(A) cellular respiration

(B) aerobic respiration

(C) anaerobic respiration

(D) none of these

Ans – (A)

62.During heavy exercise, we get cramps in legs due to accumulation of:

(A) carbon dioxide

(B) lactic acid

(C) alcohol

(D) water

Ans – (B)

(adsbygoogle = window.adsbygoogle || []).push({});

63.In earthworm, the exchange of gases occurs through

(A) lungs

(B) moist skin

(C) gills

(D) trachea

Ans – (B)

64.Normal range of breathing rate per minute in an average adult person at rest is:

(A) 9-12

(B) 15-18

(C) 21-24

(D) 30-33

Ans – (B)

65.Plants breathe through tiny pores in the leaves called

(A) stomata

(B) leaf blade

(C) pores

(D) trachea

Ans – (A)

66.During inhalation the ribs:

(A) move outwards

(B) move downwards

(C) move upwards

(D) do not move at all

Ans – (C)

67.Which of the following animals breathe through skin as well as through lungs?

(A) Fish

(B) Earthworm

(C) Cockroach

(D) Frog

Ans – (D)
