- Post category:Class 7 MCQs

Here we are providing **NCERT Class 7 Science MCQs Chapter – 2 Nutrition in Animals**, Chapter Wise MCQs for board exam is very important for board exam preparation. This book explains all the concepts and topics in very simple language that the students can easily understand the complex subjects also. This NCERT Class 7 Science MCQs Chapter – 2 Nutrition in Animals, Chapter consist all important topic regarding chapter 2 NCERT Class 7 Science MCQs Chapter – 2 Nutrition in Animals. This book basically covers all the major and minor elements that together form a democratic government. Topics like power-sharing, federalism, democracy and diversity, political parties, consequences of democracy, challenges to democracy etc. have been discussed in the NCERT Class 7 Science MCQs Chapter – 2 Nutrition in Animals. The question papers in CBSE board exams are generally based on the latest NCERT books. Hence, students must follow the NCERT book to prepare effectively for their Class 7 Science exam. 1.The false feet of Amoeba are used for

(a) movement only

(b) capturing food only

(c) capturing food and movement

(d) exchange of gases only

Ans – (C)

2.Which of the following is not a part of digestive system ?

(a) Mouth cavity

(b) Stomach

(c) Food pipe

(d) Wind pipe

Ans – (D)

3.The component of food which is complex is

(a) protein

(b) carbohydrate

(c) fat

(d) all of these

Ans – (D)

4.The largest gland in our body is:

(a) Liver

(b) Salivary gland

(c) Pancreas

(d) Gallbladder

Ans – (A)

5.The breakdown of complex components of food into simpler substances is called

(a) ingestion

(b) egestion

(c) assimilation

(d) digestion

Ans – (D)

6.The acid secreted in the stomach is

(a) Hydrochloric acid

(b) Sulphuric acid

(c) Phosphoric acid

(d) Nitric acid

Ans – (A)

7.The way of taking food by bees is

(a) swallowing

(b) sucking

(c) filtering

(d) none of these

Ans – (B)

8.The components of food absorbed in large intestine is:

(a) Carbohydrate

(b) Protein

(c) Water

(d) Fats

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

9.Which of the following animals swallow its prey?

(a) Human beings

(b) Snakes

(c) Humming birds

(d) Ant

Ans – (B)

10.Bile is produced by:

(a) Small intestine

(b) Gallbladder

(c) Liver

(d) Pancreas

Ans – (D)

11.Enzymes present in saliva converts

(a) starch into simple sugars

(b) proteins into amino acids

(c) complex sugars into simple sugars

(d) fats into fatty acids and glycerol

Ans – (A)

12.Bile plays an important role in the digestion of:

(a) Proteins

(b) Starch

(c) Fats

(d) None of these

Ans – (C)

13.From where do we take in food?

(a) Anus

(b) Mouth

(c) Stomach

(d) Oesophagus

Ans – (B)

14.The intestinal juice digests the fats into:

(a) Fatty acids

(b) Glycerol

(c) Fatty acid and glycerol

(d) Amino acids

Ans – (C)

15.The digestive tract and the associated glands together constitute the

(a) digestive system

(b) oesophagus

(c) alimentary canal

(d) nutrition system

Ans – (A)

16.The intestinal juice digests the proteins into:

(a) Fatty acids

(b) Glycerol

(c) Amino acids

(d) None of these

Ans – (C)

17.The teeth of first set fall off at the age between

(a) 10 – 20

(b) 6 – 8

(c) 9 – 1

(d) 0 – 2

Ans – (B)

18.The removing of faecal matter through the anus is called:

(a) Digestion

(b) Absorption

(c) Egestion

(d) None of these

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

19.The teeth of the first set that grew during infancy are called

(a) permanent teeth

(b) milk teeth

(c) starting teeth

(d) all of these

Ans – (B)

20.Humans can digest cellulose:

(a) Yes

(b) No

(c) Can’t say

(d) None of these

Ans – (B)

21.The teeth of the second set that replace the milk teeth are known as

(a) permanent teeth

(b) temporary teeth

(c) milk teeth

(d) hard teeth

Ans – (A)

22.Saliva breaks down the:

(a) Starch into amino acids

(b) Proteins into amino acids

(c) Starch into sugar

(d) None of these

Ans – (C)

23.The process of taking food in the body is known as

(a) egestion

(b) ingestion

(c) digestion

(d) assimilation

Ans – (B)

24.Left over food in teeth release, which gradually damages teeth.

(a) bases

(b) salts

(c) acids

(d) none of these

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

25.How many types of teeth are there?

(a) 1

(b) 2

(c) 3

(d) 4

Ans – (D)

26.The front part of tongue is sensitive to which of the following taste ?

(a) Sweet

(b) Sour

(c) Salty

(d) Bitter

Ans – (A)

27.The glands of mouth which secrete saliva are

(a) salivary glands

(b) pancreas

(c) lungs

(d) liver

Ans – (A)

29.The digestion of starch starts in:

(a) Mouth

(b) Stomach

(c) Small intestine

(d) None of these

Ans – (A)

30.Starch is broken down into sugars by the action of

(a) saliva

(b) bile juice

(c) hydrochloric acid

(d) all of these

Ans – (A)

31.The part of digestive system where no digestion takes place is:

(a) Mouth

(b) Stomach

(c) Oesophagus

(d) Small intestine

Ans – (C)

32.Which gland secretes bile juice?

(a) Liver

(b) Pancreas

(c) Bladder

(d) All of these

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

33.The digestion of food starts in which part of the digestive system:

(a) Small intestine

(b) Stomach

(c) Mouth

(d) Large intestine

Ans – (C)

34.The bile plays an important role in the digestion of

(a) carbohydrates

(b) fats

(c) sugar

(d) starch

Ans – (B)

35.Which of the following is digested in mouth ?

(a) Sugar

(b) Protein

(c) Starch

(d) All the above

Ans – (C)

36.The removal of faeces through the anus from time to time is called

(a) rumination

(b) micturition

(c) ingestion

(d) egestion

Ans – (D)

37.The digestion of food ends in which part of the digestive system ?

(a) Mouth

(b) Stomach

(c) Small intestine

(d) Large intestine

Ans – (C)

38.Cellulose is a type of

(a) fats

(b) carbon dioxide

(c) carbohydrate

(d) all of these

Ans – (C)

39.Which teeth in the mouth are used for cutting and tearing ?

(a) Molar

(b) Incisors

(c) Premolar

(d) Canine

Ans – (D)

40.The finger-like outgrowths of human intestine helps to

(a) make the food soluble

(b) absorb the digested food

(c) absorb the undigested food

(d) digest the fatty food substances

Ans – (B)

(adsbygoogle = window.adsbygoogle || []).push({});

41.The end part of tongue is sensitive to which of the following taste ?

(a) Sweet

(b) Sour

(c) Salty

(d) Bitter

Ans – (D)

42.The process through which undigested food is expelled out of the body is called

(a) digestion

(b) absorption

(c) assimilation

(d) egestion

Ans – (D)

43.In amoeba, ingestion of food takes place with the help of:

(a) Tentacles

(b) Pseudopodia

(c) Stomata

(d) None of these

Ans – (B)

44.Many animals, including humans, cannot digest

(a) amino acid

(b) bile juice

(c) cellulose

(d) proteins

Ans – (C)

45.The undigested food is eliminated through:

(a) Anus

(b) Caecum

(c) Rectum

(d) None of these

Ans – (A)

46.Which of the following is the term used for the partially digested food in the rumen of animals?

(a) Cud

(b) Food

(c) Juice

(d) Liquid

Ans – (A)

47.Villi are present in the inner walls of:

(a) Stomach

(b) Small intestine

(c) Large intestine

(d) None of these

Ans – (B)

48.Which of the following are called the cutting teeth?

(a) Incisors

(b) Canines

(c) Molars

(d) Premolars

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

49.Grass eating animals quickly swallow the grass and store it in a part of stomach called:

(a) Gall bladder

(b) Rumen

(c) Lower stomach

(d) None of these

Ans – (B)

50.The process by which organisms take in food is called

(a) digestion

(b) assimilation

(c) ingestion

(d) egestion

Ans – (C)

51.Grass is rich in:

(a) Proteins

(b) Starch

(c) Cellulose

(d) None of these

Ans – (B)

52.The digestive food is absorbed in

(a) large intestine

(b) stomach

(c) liver

(d) small intestine

Ans – (D)

53.The gland located just below the stomach is:

(a) Liver

(b) Pancreas

(c) Gall bladder

(d) None of these

Ans – (B)

54.The mode of nutrition in amoeba is

(a) saprotrophic

(b) autotrophic

(c) holozoic

(d) symbiotic

Ans – (C)

55.Number of canines present in an adult are:

(a) 4

(b) 6

(c) 8

(d) 16

Ans – (A)

56.Salivary glands are located in

(a) mouth

(b) liver

(c) stomach

(d) large intestine

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

57.The teeth which helps in biting the food are the:

(a) Canines

(b) Incisors

(c) Premolar

(d) Molars

Ans – (B)

58.What is the function of the tongue?

(a) Digest the food

(b) Converted food into semi-solid paste

(c) Mix the food with saliva and swallow it

(d) Pass out the undigested waste material

Ans – (C)

59.Bile is produced in

(a) Gall bladder

(b) Blood

(c) Liver

(d) Spleen

Ans – (C)

60.What is the function of premolars?

(a) Biting

(b) Grinding

(c) Tearing

(d) Cutting

Ans – (B)

61.Cud is the name given to the food of ruminants which is:

(a) swallowed and undigested.

(b) swallowed and partially digested.

(c) properly chewed and partially digested.

(d) properly chewed and completely digested.

Ans – (B)

(adsbygoogle = window.adsbygoogle || []).push({});

62.Oesophagus is connected with

(a) stomach

(b) intestine

(c) liver

(d) rectum

Ans – (A)

63.The false feet of Amoeba are used for:

(a) movement only

(b) capture of food only

(c) capture of food and movement

(d) exchange of gases only

Ans – (C)

64.Rumination can

(a) digest the cellulose

(b) not digest the cellulose

(c) may or may not digest cellulose

(d) all of these

Ans – (A)

65.The finger-like outgrowths of Amoeba helps to ingest food. However, the finger-like outgrowths of human intestine helps to:

(a) digest the fatty food substances

(b) make the food soluble

(c) absorb the digested food

(d) absorb the undigested food

Ans – (C)

66.Gastric digestion takes place efficiently in

(a) acidic medium

(b) alkaline medium

(c) neutral medium

(d) highly alkaline medium

Ans – (A)

67.Saliva is present in

(a) stomach

(b) liver

(c) teeth

(d) mouth

Ans – (D)

68.Which is not digested by human?

(a) Protein

(b) Fats

(c) Glucose

(d) Cellulose

Ans – (D)

69.The largest gland in the human body is

(a) liver

(b) pancreas

(c) stomach

(d) oesophagus

Ans – (A)

70.How many premolars teeth found in mouth?

(a) 2

(b) 4

(c) 6

(d) 8

Ans – (B)

71.The process in which the absorbed food is used for producing energy is called

(a) ingestion

(b) absorption

(c) assimilation

(d) digestion

Ans – (C)
