- Post category:Class 7 MCQs

Here we are providing **NCERT Class 7 Science MCQs Chapter – 5 Acids, Bases and Salts**, Chapter Wise MCQs for board exam is very important for board exam preparation. This book explains all the concepts and topics in very simple language that the students can easily understand the complex subjects also. This NCERT Class 7 Science MCQs Chapter – 5 Acids, Bases and Salts, Chapter consist all important topic regarding chapter 5 NCERT Class 7 Science MCQs Chapter – 5 Acids, Bases and Salts. This book basically covers all the major and minor elements that together form a democratic government. Topics like power-sharing, federalism, democracy and diversity, political parties, consequences of democracy, challenges to democracy etc. have been discussed in the NCERT Class 7 Science MCQs Chapter – 5 Acids, Bases and Salts. The question papers in CBSE board exams are generally based on the latest NCERT books. Hence, students must follow the NCERT book to prepare effectively for their Class 7 Science exam. 1.Acids taste

(A) sour

(B) sweet

(C) bitter

(D) salty

Ans – (A)

2.. Mohan Appeared In Class Test Where He Wrote Some Statements About Acids, But He Confused To Know The Correct Statement. Would You Help Him To Know That?

(A) They have a sour taste.

(B) They are corrosive in nature if it falls on the skin, it can cause burns.

(C) They are good conductors of electricity, as they allow the passage of electric current through them.

(D) All the above.

Ans – (D)

3.When CO_2 gas is passed through limewater, it turns milky. Which of the following compounds is responsible for this milkiness ?

(A) Calcium oxide

(B) Calcium chloride

(C) sodium carbonate

(D) Calcium carbonate

Ans – (D)

4.Bases taste

(A) sweet

(B) sour

(C) bitter

(D) salty

Ans – (C)

5.Which of the following ion is responsible for the acidic nature of hydrochloric acid ?

(A) Hydrogen ion

(B) Hydroxide ion

(C) Chloride ion

(D) Hydrochloride ion

Ans – (A)

6.Colours of phenolphthalein indicator in acidic and basic medium, respectively are

(A) pink and colourless

(B) colourless and pink

(C) blue and red

(D) red and blue

Ans – (B)

7.Distilled water is:

(A) acidic

(B) basic

(C) neutral

(D) none of these

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

8.The nature of bases is

(A) acidic

(B) basic

(C) neutral

(D) all of these

Ans – (B)

9.Ammonia that turns red litmus blue is:

(A) acidic

(B) basic

(C) neutral

(D) none of these

Ans – (B)

10.Which of the following feel soapy on touching?

(A) Acid

(B) Base

(C) Salt

(D) None of these

Ans – (B)

11.An antacid tablet is given to a person when he suffers from:

(A) obesity

(B) acidity

(C) dog bite

(D) none of these

Ans – (B)

12.Which of the following is a natural indicator?

(A) China rose petal

(B) Turmeric

(C) Litmus

(D) All of these

Ans – (D)

13.Ant's bite injects:

(A) acetic acid

(B) formic acid

(C) hydrochloric acid

(D) none of these

Ans – (B)

14.The most commonly used natural indicator is

(A) turmeric

(B) beetroot

(C) China rose petal

(D) litmus

Ans – (D)

16.The acid that our stomach releases is:

(A) sulphuric acid

(B) nitric acid

(C) hydrochloric acid

(D) formic acid

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

17.The correct way of making a solution of acid in water is to

(A) add water to acid

(B) add acid to water

(C) mix acid and water simultaneously

(D) add water to acid in a shallow container

Ans – (B)

18.Neutralisation reaction is the reaction between:

(A) acid and base

(B) salt and water

(C) base and salt

(D) acid and salt

Ans – (A)

19.Which of the following is basic in nature?

(A) Lime water

(B) Baking soda

(C) Both (A) and (b)

(D) Lemon juice

Ans – (C)

20.When the soil is too acidic, it is treated with:

(A) salt

(B) water

(C) base

(D) acid

Ans – (C)

21.Litmus is extracted from

(A) curd

(B) grapes

(C) lichens

(D) cabbage

Ans – (C)

22.Quick lime is used in soil when the soil is:

(A) basic

(B) acidic

(C) salty

(D) neutral

Ans – (B)

23.Calcium hydroxide is found in

(A) window cleaner

(B) lime water

(C) soap

(D) lime juice

Ans – (B)

24.If the soil is too basic, it is treated with:

(A) quicklime

(B) salt

(C) organic matter

(D) water

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

25.On adding phenolphthalein indicator to a colourless solution, no change is observed. The nature of the solution may be

(A) acidic or basic

(B) basic

(C) acidic or neutral

(D) basic or neutral

Ans – (C)

26.The factory waste are neutralised by adding:

(A) acidic substances

(B) salts

(C) basic substances

(D) water

Ans – (C)

27.Neutralisation reactiõn is a

(A) physical and reversible change

(B) physical and irreversible change

(C) chemical and reversible change

(D) chemical and irreversible change

Ans – (D)

28.Soap is:

(A) acidic

(B) basic

(C) neutral

(D) salt

Ans – (B)

29.When a drop of vinegar solution is put on the litmus paper, it turns

(A) red

(B) blue

(C) green

(D) yellow

Ans – (A)

30.Litmus is a natural indicator which is extracted from:

(A) vinegar

(B) citrus fruits

(C) lichens

(D) spinach

Ans – (C)

31.Tap water is

(A) acidic

(B) basic

(C) neutral

(D) depends on source

Ans – (D)

32.The colour of litmus in distilled water is:

(A) red

(B) green

(C) blue

(D) purple

Ans – (D)

(adsbygoogle = window.adsbygoogle || []).push({});

33.When phenolphthalein is added to a acidic solution, it gives

(A) pink colour

(B) red colour

(C) blue colour

(D) no colour

Ans – (D)

34.Tartaric acid is found in:

(A) vinegar

(B) curd

(C) amla

(D) tamarind

Ans – (A)

35.A neutralisation reaction gives

(A) salt and water

(B) acid and salt

(C) base and salt

(D) acid and base

Ans – (A)

36.Calcium hydroxide is found in:

(A) soap

(B) lime water

(C) vinegar

(D) milk of magnesia

Ans – (B)

37.Our stomach contains

(A) hydrochloric acid

(B) sodium hydroxide

(C) sulphuric acid

(D) nitric acid

Ans – (A)

38.Citric acid is found in:

(A) fruits

(B) vegetables

(C) citrus fruits

(D) all of these

Ans – (C)

39.When we suffer from acidity, we should take

(A) iron tonic

(B) vitamins

(C) antacid

(D) lactocalamine

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

40.Blue litmus paper is dipped in a solution. It remains blue. What is the nature of solution ?

(A) Acid and base

(B) Base and neutral

(C) Acid apd neutral

(D) None of these

Ans – (B)

41.An oxide is acidic and has a pungent odour. It could be

(A) sulphur dioxide

(B) carbon dioxide

(C) sodium oxide

(D) nitrogen dioxide

Ans – (D)

42.When an ant bites, it injects

(A) acidic liquid

(B) basic liquid

(C) both (A) and (b)

(D) neutral liquids

Ans – (A)

43.Out of these gases which one is used in fire extinguishers

(A) CO_2

(B) SO_2

(C) NO_2

(D) H_2S

Ans – (A)

44.Substances that have sour taste and turn blue litmus red are called

(A) acids

(B) bases

(C) salts

(D) water

Ans – (A)

45.The correct way of making a solution of acid in water is to

(A) add water to acid

(B) add acid to water

(C) mix acid and water simultaneously

(D) add water to acid in a shallow container

Ans – (B)

46.Acid used in eye wash is

(A) carbonic acid

(B) acetic acid

(C) benzoic acid

(D) boric acid

Ans – (D)

47.Products of a neutralisation reaction are always:

(A) an acid and a base

(B) an acid and a salt

(C) a salt and water

(D) a salt and a base

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

48.Acid which is used as a source of vitamin C is

(A) citric acid

(B) carbonic acid

(C) boric acid

(D) tartaric acid

Ans – (A)

49.Turmeric is a natural indicator. On adding its paste to acid and base separately, which colours would be observed.

(A) Yellow in both acid and base

(B) Yellow in acid and red in base

(C) Pink in acid and yellow in base

(D) Red in acid and blue in base

Ans – (B)

50.A base which is used for removing grease and stains from woollen clothes is

(A) ammonium hydroxide

(B) magnesium hydroxide

(C) sodium hydroxide

(D) calcium hydroxide

Ans – (A)

51.Phenolphthalein is a synthetic indicator and its colours in acidic and basic solutions, respectively are:

(A) red and blue

(B) blue and red

(C) pink and colourless

(D) colourless and pink

Ans – (D)

52.Neutralisation is a reaction between

(A) two acids

(B) two bases

(C) one acid and one base

(D) one acid and one neutral substance

Ans – (D)

53.When the soil is too basic, plants do not grow well in it. To improve its quality what must be added to the soil?

(A) Organic matter

(B) Quick lime

(C) Slaked lime

(D) Calamine solution

Ans – (A)

54.Sting of an ant contains

(A) vinegar

(B) common salt

(C) formic acid

(D) milk of magnesia

Ans – (C)

55.Which of the following set of substances contain acids?

(A) Grapes, lime water

(B) Vinegar, soap

(C) Curd, milk of magnesia

(D) Curd, vinegar

Ans – (D)

(adsbygoogle = window.adsbygoogle || []).push({});

56.Lime water turns

(A) red litmus into blue

(B) blue litmus to red

(C) no change

(D) can’t predict

Ans – (A)

57.On adding phenolphthalein indicator to a colourless solution, no change is observed. What is the nature of this solution?

(A) Basic

(B) Either acidic or basic

(C) Either acidic or neutral

(D) Either basic or neutral

Ans – (C)

58.Common salt is

(A) acidic

(B) basic

(C) neutral

(D) none of these

Ans – (C)

59.Which of the following is an acid-base indicator?

(A) Vinegar

(B) Lime water

(C) Turmeric

(D) Baking soda

Ans – (C)

60.Milk of magnesia is used as antacid because

(A) it is acidic

(B) it is basic

(C) it is neutral

(D) all of above

Ans – (B)

61. Which Of The Following Statement(S) Is Or Are incorrect ?

(A) Lemon water is basic in nature.

(B) A compound if acidic will turn all indicators red.

(C) Common salt dissolved in water turns blue litmus red.

(D) All of the above.

Ans – (D)

62.Colour of phenolphthalein in acidic solution is

(A) colourless

(B) pink

(C) yellow

(D) orange

Ans – (A)

63. Boojho Wants To Know Different Colours In Different Solutions With The Help Of Red Litmus Paper. Consider The Following Sentences And Choose The Correct One And Help Him:

(A) Milk in water shows no change.

(B) Baking powder in water turns blue.

(C) Blue vinegar in water source no change.

(D) All the above.

Ans – (A)

64.Process in which acids and bases react to form salt and water is called

(A) neutralisation

(B) hydrogenation

(C) sublimation

(D) all of these

Ans – (A)

65. Boojho Is Writing Some Statements, Choose The Correct Statement And Help Him:

(A) Heat is responsible for increase in temperature during a neutralization reaction.

(B) Turmeric is a natural indicator and gives pink colour in basic solution.

(C) Acids are good conductors of electricity; as they allow the passage of electric current through them.

(D) All the above.

Ans – (D)
