- Post category:Class 7 MCQs

Here we are providing **NCERT Class 7 Science MCQs Chapter – 6 Physical and Chemical Changes**, Chapter Wise MCQs for board exam is very important for board exam preparation. This book explains all the concepts and topics in very simple language that the students can easily understand the complex subjects also. This NCERT Class 7 Science MCQs Chapter – 6 Physical and Chemical Changes, Chapter consist all important topic regarding chapter 6 NCERT Class 7 Science MCQs Chapter – 6 Physical and Chemical Changes. This book basically covers all the major and minor elements that together form a democratic government. Topics like power-sharing, federalism, democracy and diversity, political parties, consequences of democracy, challenges to democracy etc. have been discussed in the NCERT Class 7 Science MCQs Chapter – 6 Physical and Chemical Changes. The question papers in CBSE board exams are generally based on the latest NCERT books. Hence, students must follow the NCERT book to prepare effectively for their Class 7 Science exam. If you want color notes then **click here**

1.Which of the following statement is incorrect for a chemical reaction?

(A) Heat may be given out but never absorbed

(B) Sound may be produced

(C) A colour change may take place

(D) A gas may be evolved

Ans – (A)

2. The process of forming substances in their pure state from their solution is known as:

(A) galvanisation

(B) neutralisation

(C) crystallisation

(D) all of these

Ans – (C)

3.Neutralisation is a:

(A) physical change

(B) chemical change

(C) both (A) and (b)

(D) none of these

Ans – (B)

4.Properties like size, shape, colour, state of a substance are

(A) chemical properties

(B) mental properties

(C) physical properties

(D) physico-chemical properties

Ans – (C)

5. Which of the following is an example of physical change?

(A) A bud turning into a flower

(B) Rusting of iron

(C) Boiling of water

(D) Ripening of a tomato

Ans – (C)

6.Rusting can be prevented by:

(A) preventing iron from coming in contact with air and moisture by applying greese or paint

(B) deposit a layer of a metal like chromium or zinc on iron

(C) both (A) and (b)

(D) none of these

Ans – (C)

7.A physical change is generally

(A) reversible

(B) irreversible

(C) considerable

(D) all of these

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

8.The process of forming substances in their pure state from their solution is known as:

(A) galvanisation

(B) neutralisation

(C) crystallisation

(D) all of these

Ans – (C)

9.During a physical change, a substance undergoes a change in its

(A) physical properties

(B) chemical properties

(C) both (A) and (b)

(D) none of these

Ans – (A)

10.The process of depositing a layer of zinc on iron is called:

(A) galvanisation

(B) neutralisation

(C) crystallisation

(D) none of these

Ans – (A)

11.Rusting of iron is a

(A) physical change

(B) chemical change

(C) both (A) and (b)

(D) all of these

Ans – (A)

12.Ships suffer a lot of damage from rusting inspite of being painted because:

(A) sea water contains many salts

(B) sea water is bitter

(C) sea water is sour

(D) sea water is sweet

Ans – (A)

13.Rusting occurs when iron is exposed to

(A) oxygen and water

(B) soil and rain

(C) breeze and sunlight

(D) salt water and clouds

Ans – (A)

14.When carbon dioxide is passed through lime water, the substance formed is

(A) calcium oxide

(B) calcium carbonate

(C) both (A) and (b)

(D) none of these

Ans – (B)

15.A chemical change is also called a

(A) chemical reaction

(B) rusting

(C) both (A) and (b)

(D) all of these

Ans – (A)

16.When you leave a piece of iron in the open for some time, it acquires a film of brownish substance. The substance is called:

(A) acid

(B) base

(C) rust

(D) none of these

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

17.Burning of any substance is a/an

(A) physical change

(B) chemical change

(C) irreversible change

(D) both (B) and (c)

Ans – (D)

18.Burning the magnesium ribbon is a:

(A) physical change

(B) chemical change

(C) rusting

(D) all of these

Ans – (B)

19.The process of depositing a layer of zinc over iron is known as

(A) aluminisation

(B) galvanisation

(C) fertilisation

(D) ironing

Ans – (B)

20.The gas we use in the kitchen is called liquified petroleum gas (LPG). In the cylinder it exists as a liquid. When it comes out from the cylinder it becomes a gas (Change-A) then it burns (Change-B). The following statements pertain to these changes. ChooSe the correct one.

(A) Process-A is a chemical change

(B) Process-B is-a chemical change

(C) Both proceses A and B are chemical changes.

(D) None of these processes are . chemical changes

Ans – (B)

21.Two drops of dilute sulphuric acid were added to 1 g of copper sulphate powder and then small amount of hot water was added to dissolve it (step I). On cooling, beautiful blue-coloured crystals got separated (step II). Step I and step II are

(A) physical and chemical changes respectively.

(B) chemical and physical changes respectively.

(C) both physical change

(D) both chemical change

Ans – (C)

22.Which of the following is a reversible change ?

(A) Rusting

(B) Chemical

(C) Physical

(D) All of these

Ans – (C)

23.Which among the following is a physical change?

(A) Burning of wood

(B) Ripening of fruit

(C) Cutting a log of wood in small pieces

(D) Cooking of food

Ans – (C)

24.Anaerobic bacteria digests animal waste and produces biogas (Change-A). The biogas is then burnt as fuel (Change-B). The following statements pertain to these changes. Choose the correct one.

(A) Process-A is a chemical change

(B) Process-B is a chemical change

(C) Both processes A and B are .chemical changes

(D) None of these processes are chemical changes

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

25.Which of the following is a chemical change?

(A) Germination of seeds

(B) Cutting a piece of paper

(C) Bursting of fire crackers

(D) Both (A) and (c)

Ans – (D)

26.Which of the following is an irreversible change ?

(A) Physical

(B) Rusting

(C) Chemical

(D) None of these

Ans – (C)

27.A chemical change may bring

(A) evolution of gas

(B) change in colour

(C) change in taste

(D) all of these

Ans – (D)

28.The chemical name of baking soda is:

(A) hydrogen carbonate

(B) calcium carbonate

(C) sodium hydrogen carbonate

(D) none of these

Ans – (D)

29.Which is the formula of ozone?

(A) Fe_2O_3

(B) Fe_3O_2

(C) O_2

(D) O_3

Ans – (D)

30.Condensation of steam is not a:

(A) chemical change

(B) physical change

(C) rusting

(D) both (A) and (c)

Ans – (D)

31.Physical changes are

(A) reversible

(B) irreversible

(C) permanent

(D) temporary.

Ans – (A)

32.Beating the alluminium in the boil is a:

(A) chemical change

(B) rusting

(C) physical change

(D) none of these

Ans – (C)

(adsbygoogle = window.adsbygoogle || []).push({});

33.A change of state from one form to another is a

(A) physical change

(B) chemical change

(C) biological change

(D) state variation

Ans – (A)

34.When baking soda is mixed with lemon juice, bubbles are formed with evolution of a gas. A new substance carbon dioxide gas is formed, is a:

(A) physical change

(B) crystallisation

(C) galvanisation

(D) chemical change

Ans – (A)

35.Which of the following is an example of a physical change?

(A) Mixing of baking soda and vinegar together to cause bubbles and foam.

(B) Falling of a glass cup from the counter and its shattering on the ground.

(C) Lighting a piece of paper on fire causing it to bum up and leave ashes.

(D) Baking a birthday cake for your mother.

Ans – (B)

36.Blooming of flower is a:

(A) chemical change

(B) physical change

(C) rusting

(D) galvanisation

Ans – (A)

37.Which of the following is an example of a chemical change?

(A) Filling up a balloon with hot air.

(B) Taking a glass of water and freezing it by placing it in the freezer.

(C) A plant collecting sunlight and turning it into food.

(D) Your dog ripping up your homework.

Ans – (C)

38.A change that affects iron articles and slowly destroys them is:

(A) Rusting

(B) Galvanisation

(C) Chemical change

(D) Crystallisation

Ans – (A)

39.Which of the following changes can easily be reversed?

(A) Chemical Change

(B) Physical Change

(C) Both physical and chemical changes

(D) Neither physical nor chemical change

Ans – (B)

40.Photosynthesis is a:

(A) chemical change

(B) physical change

(C) rusting

(D) crystallisation

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

41.When a new substance is formed with different properties than those of the original substance, it is called a

(A) chemical change

(B) physical change

(C) freezing

(D) boiling

Ans – (A)

42.Stainless steel, which doesn't rust, is made by mixing iron with carbon and metals like:

(A) chromium

(B) nickel

(C) manganese

(D) all of these

Ans – (D)

43.If the chemical properties of a substance remain unchanged and its appearance or shape changes, it is called a

(A) chemical change

(B) physical change

(C) both physical and chemical changes

(D) neither physical nor chemical change

Ans – (B)

44.Rusting of iron objects is faster in:

(A) deserts

(B) coastal areas

(C) both (A) and (b)

(D) none of these

Ans – (B)

45.Which of the following is an example of a physical change?

(A) Metal rusting

(B) Silver tarnishing

(C) Water boiling

(D) Paper burning

Ans – (C)

46.In which type of change a new substance is formed?

(A) In physical change

(B) In chemical change

(C) In both (A) and (b)

(D) In neither of these

Ans – (B)

47.Which characteristic best describes a physical change?

(A) Composition changes

(B) Composition stays the same

(C) Form stays the same

(D) Mass is lost

Ans – (B)

(adsbygoogle = window.adsbygoogle || []).push({});

48.Which among the following is a physical change?

(A) Cutting a log of wood in small pieces

(B) Burning of wood

(C) Ripening of fruit

(D) Cooking of food

Ans – (A)

49.Which of the following is a chemical change?

(A) Freezing of water

(B) Cutting of wood

(C) Baking of bread

(D) Bending of wire

Ans – (C)

50.Which of the following is a chemical change?

(A) Bursting of a fire cracker

(B) Germination of seed

(C) Coal formation from buried trees

(D) All of these

Ans – (D)

51.Which of the following is not a clue that could indicate the occurrence of a chemical change?

(A) Change in colour

(B) Change in shape

(C) Change in energy

(D) Change in odour

Ans – (B)

52.Which is a method to prevent rust?

(A) Crystallization

(B) Sedimentation

(C) Galvanisation

(D) None of these

Ans – (C)

53.Which property stays the same during physical and chemical changes?

(A) Density

(B) Shape

(C) Mass

(D) Arrangement of particles

Ans – (C)

54.How crystal of pure substances are obtained?

(A) By crystallization

(B) By chromatography

(C) By peptization

(D) By all these methods

Ans – (A)
