- Post category:Class 7 MCQs

Here we are providing **NCERT Class 7 Science MCQs Chapter –** 9 Soil, Chapter Wise MCQs for board exam is very important for board exam preparation. This book explains all the concepts and topics in very simple language that the students can easily understand the complex subjects also. This NCERT Class 7 Science MCQs Chapter – 9 Soil, Chapter consist all important topic regarding chapter 6 NCERT Class 7 Science MCQs Chapter – 9 Soil. This book basically covers all the major and minor elements that together form a democratic government. Topics like power-sharing, federalism, democracy and diversity, political parties, consequences of democracy, challenges to democracy etc. have been discussed in the NCERT Class 7 Science MCQs Chapter – 9 Soil. The question papers in CBSE board exams are generally based on the latest NCERT books. Hence, students must follow the NCERT book to prepare effectively for their Class 7 Science exam. 1.The rotten dead matter in the soil is called:

(A) organic matter

(B) sand

(C) humus

(D) silt

Ans – (A)

2.Soil is the substance which makes up the _____ of the earth.

(A) rock

(B) layers

(C) surface

(D) all of the above

Ans – (C)

3.Soil is formed from the parent rock material by a very slow and gradual process called:

(A) processing

(B) weathering

(C) breaking

(D) cutting

Ans – (B)

4.Which one of the following is a step in the formation of soil?

(A) Earthquakes or volcanic eruptions

(B) Weathering of rocks

(C) Addition of humus

(D) All of these

Ans – (D)

5.The uppermost layer of earth's crust, in which plants grow is:

(A) soil

(B) land

(C) water

(D) none of these

Answer – (B)

6.Which factor influences soil formation?

(A) Climate

(B) Vegetation

(C) Microorganism

(D) All of these

Ans – (D)

7.The uses of soil are:

(A) soil gives crop

(B) soil gives support to buildings

(C) toys can be made from soil

(D) all of these

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

8.Which of the following does not cause soil erosion?

(A) Deforestation

(B) Terrace farming

(C) Floods

(D) Overgrazing

Ans – (B)

9.Soil is polluted by:

(A) air

(B) water

(C) polythene bags

(D) none of these

Ans – (D)

10.Soil conservation measures are mainly aimed at protecting

(A) plants

(B) top soil

(C) sub soil

(D) soil organisms

Ans – (B)

11.A vertical section through different layers of the soil is:

(A) horizons

(B) soil profile

(C) both (A) and (b)

(D) none of these

Ans – (C)

12.In which horizon of soil minerals are found? .

(A) A

(B) B

(C) C

(D) None

Ans – (B)

13.Different layers of the soil differs in feels colours, depth and chemical composition are:

(A) horizons

(B) soil profile

(C) weathering

(D) can’t say

Ans – (B)

14.The mixture of rock particles and humus is called

(A) soil

(B) weathering

(C) silt

(D) gravel

Ans – (A)

15.What kind of soil should be used for making matkas and surahis ?

(A) clayey soil

(B) loamy soil

(C) sandy soil

(D) can’t say

Ans – (A)

16.One of the following is not a type of soil. This one is

(A) loamy soil

(B) silty soil

(C) clayey soil

(D) sandy soil

Ans – (B)

(adsbygoogle = window.adsbygoogle || []).push({});

17.The forumla used to calculate the rate of percolation is:

(A) percolation rate = amount of water (ml) percolation time (min)

(B) percolation rate = amount of water X percolation time 1

(C) percolation rate = amount of water X percolation time

(D) none of these

Ans – (A)

18.Which of the following has smallest size soil particles?

(A) Gravel

(B) Silt

(C) Clay

(D) Sand

Ans – (C)

19.Which type of soil will allow water to reach a well faster and in greater amount ?

(A) clayey soil

(B) sandy soil

(C) loamy soil

(D) none of these

Ans – (A)

20.In which of the following humus is present in reasonable amount

(A) A-horizon

(B) B-horizon

(C) C-horizon

(D) Bedrock

Ans – (A)

21.Which type of soil retains the highest amount of water ?

(A) clayey soil

(B) sandy soil

(C) loamy soil

(D) none of these

Ans – (B)

22.Which of the following cannot prevent soil erosion?

(A) Reforestation

(B) Deforestation

(C) Silviculture

(D) Plantation

Ans – (B)

23.Which type of soil retains the least amount of water ?

(A) sandy soil

(B) loamy soil

(C) clayey soil

(D) none of these

Ans – (A)

24.The topmost layer of soil is known as

(A) top soil

(B) sandy soil

(C) sub soil

(D) bed soil

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

25.Rain water can be percolated by making:

(A) big holes

(B) small holes

(C) tanks

(D) wells

Ans – (A)

26.Sandy soils are found in

(A) hilly areas

(B) tropical region

(C) deserts

(D) polar region

Ans – (C)

27.Wind, rainfall,’temperature, light and humidity affect the:

(A) soil

(B) water

(C) air

(D) mountains

Ans – (B)

28.Less humus and more minerals occur in the

(A) A-horizon

(B) B-horizon

(C) C-horizon

(D) bedrock

Ans – (C)

29.Loamy soil is most suitable for planting:

(A) rice crop

(B) pulses crop

(C) cotton crop

(D) all of these

Ans – (A)

30.Which of these has the smallest size of particles?

(A) Sand

(B) Silt

(C) Clay

(D) Gravel

Ans – (C)

31.The removal of land surface by water, wind or ice is known as:

(A) soil erosion

(B) horizons

(C) humus

(D) rocks

Ans – (A)

32.Which type of soil is the best for growing cotton?

(A) Sandy

(B) Clayey

(C) Loamy

(D) Sandy-loam

Ans – (D)

(adsbygoogle = window.adsbygoogle || []).push({});

33.The hard layer of rocks below the C horizon is called:

(A) bottom rock

(B) substratum

(C) bed rock

(D) gravel

Ans – (D)

34.Which of these do not cause weathering?

(A) Clouds

(B) Wind

(C) Flowing water

(D) Freezing of rainwater

Ans – (A)

35.Soil carried from else where and deposits them in the:

(A) substratum

(B) B horizon

(C) C horizon

(D) transported soil

Ans – (D)

36.Which horizon consists of small lumps of rocks with cracks and crevices?

(A) A-horizon

(B) B-horizon

(C) C-horizon

(D) None of these

Ans – (C)

37.Rain water washes off minerals and deposits them in the:

(A) substratum

(B) B horizon

(C) C horizon

(D) R horizon

Ans – (D)

38.Water logging can be expected in the soil which is rich in

(A) sand

(B) clay

(C) silt

(D) humus

Ans – (B)

39.Which soil is found in the fertile plains of Punjab and Uttar Pradesh ?

(A) red Soil

(B) black soil

(C) alluvial soil

(D) leteritic soil

Ans – (B)

40.Paddy grows best in

(A) clayey soil

(B) loamy soil

(C) sandy soil

(D) sandy-loam soil

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

41.The colour of red soil is due to presence of:

(A) minerals

(B) iron oxide

(C) vitamins

(D) none of these

Ans – (C)

42.Which of the following factors influences soil formation?

(A) Climate

(B) Vegetation

(C) Parent rock

(D) All of these

Ans – (D)

43.Bacteria, fungi, algael and tiny organisms called:

(A) humus

(B) protozoans

(C) biota

(D) all of these

Ans – (B)

44.The breaking of rocks by the action of wind, water and climate is called

(A) soil profile

(B) humus

(C) weathering

(D) water logging

Ans – (C)

45.The best kind of soil for plant growth is:

(A) loamy soil

(B) clayey soil

(C) sandy soil

(D) all of these

Ans – (A)

46.The layer which is soft, porous and can retain more water is

(A) topsoil

(B) B-horizon

(C) C-horizon

(D) bedrock

Ans – (A)

47. _ are soils in which more than half of the parent mineral matter is volcanic ash and appear very dark in colour.

(A) Desert soil

(B) Volcanic soil

(C) Alluvial soil

(D) Clayey soil

Ans – (B)

48.To improve the capacity to hold water ……. is added to the soil:

(A) rocks

(B) humus

(C) gravel

(D) sand

Ans – (B)

49. The rotten dead matter in the soil is called:

(A) organic matter

(B) sand

(C) humus

(D) silt

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

50.Breaking down of rock to form soil is caused by:

(A) water

(B) air

(C) temperature

(D) all of these

Ans – (D)

51. A well-developed soil profile is the result of:

(A) physical process

(B) chemical process

(C) organic process

(D) All of the above

Ans – (D)

52.Cause of soil erosion is:

(A) less rainfall

(B) excess of vegetation

(C) lack of vegetation

(D) plenty of rocks

Ans – (C)

53. Soil is formed from the parent rock material by a very slow and gradual process called:

(A) processing

(B) weathering

(C) breaking

(D) cutting

Ans – (B)

54.Humus is present in:

(A) bad rock

(B) gravel

(C) topsoil

(D) subsoil

Ans – (C)

55. Which physical property of soil is important to us?

(A) Texture

(B) Water holding capacity

(C) Both of these

(D) None of these

Ans – (C)

56.Humus is made up of:

(A) inorganic matter

(B) loose soil

(B) sub soil

(C) gravel

(D) bad rock

Ans – (C)

57. Of the four distinct layers or sections of soil profile, organic matter is found in:

(A) top soil

(B) second layer from the top

(C) third layer from the top

(D) the bottom layer

Ans – (A)

58.Fertility of soil is increased by the presence of:

(A) bacteria

(B) fungi

(C) insects

(D) all of these

Ans – (A)

(adsbygoogle = window.adsbygoogle || []).push({});

59. Which of the following type of soil will form a colloidal solution when suspended in water?

(A) Clay

(B) Silt

(C) Sand

(D) Gravel

Ans – (A)

60.aerates the soil and allows the air to reach the roots of plants:

(A) earthworm

(B) becteria

(C) fungi

(D) virus

Ans – (D)
