Class 7 Science NCERT Solutions in English Chapter – 3 fiber to Fabric

- Post category:Class 7 Science NCERT Solution In English

Here we are providing **Class 7 Science NCERT Solutions in English** Chapter – 3 fiber to Fabric include all questions presented in the NCERT Science Class 7 books. Candidates can enlist the help of the NCERT Science Class 7 solutions in English on the next page and gain a deeper understanding of the concepts. NCERT Class 7 Science NCERT Solutions in English Chapter – 3 fiber to Fabric Class 7 Science NCERT Solutions in English Chapter – 3 fiber to Fabric is designed by our team of subject matter experts to help students prepare for exams. English students can view the PDF of the NCERT Class 7 Science Solutions on the page below. From the NCERT Science Book English Questions and Answers on this page, students will learn how to correctly solve NCERT problems.

Remember that the NCERT Class 7 Science Book Solution is the best resource for a good study of the 18 chapters. Use the NCERT Class 7 Science Book Solution as a reference and keep practicing with the answers to questions and exercises until you improve your answers to all chapters of your Class 7 Science Program. Class 7 Science NCERT Solutions in English Chapter – 3 fiber to Fabric will help you solve all NCERT Class 7 Science questions chapter 3 smoothly. if you want more notes for various subject then **click here**

Class 7 Science NCERT Solutions in English Chapter – 3 fiber to Fabric

---

Q 1:

You must be familiar with the following nursery rhymes:

(i) ‘Baa baa black sheep, have you any wool.’

(ii) ‘Mary had a little lamb, whose fleece was white as snow.’

Ans the following:

(a) Which parts of the black sheep have wool?

(b) What is meant by the white fleece of the lamb?

Ans 1:

(a) The fine and soft under-hair that grows close to the skin of the sheep have wool. (b) White fleece of lamb means the colour of the fleece of lamb is white. The natural fleece of sheep and goats is black, brown or white.

Q 2:

The silkworm is (a) a caterpillar, (b) a larva. Choose the correct option. (i) a (ii) b (iii) both a and b (iv) neither a nor b.

Ans 2:

(iii) both a and b

Q 3:

Which of the following does not yield wool?

(I) Yak

(ii) Camel

(iii) Goat

(iv) Woolly dog

Ans 3:

(iv) Woolly dog

Q 4:

What is meant by the following terms?

(i) Rearing

(ii) Shearing

(iii) Sericulture

Ans 4:

Rearing: It is raising and taking care of livestock (e.g. cows, buffaloes, goats etc.); for commercial purposes. These animals are fed, provided shelters and are bred for better yield like milk, meat, wool etc. For example, Sheep are reared mainly for the wool. They are mainly reared in areas with low rainfall. Reared sheep eat grass and leaves. They are also fed on a mixture of pulses, corn, jowar, oil cakes and minerals. In winters they are kept indoors and fed on dry fodder, leaves and grains.

(ii) **Shearing :-** Once a sheep develops a thick coat of hair, it is shaved off to obtain wool. The process of cutting off the woolen fleece of sheep with a thin layer of skin is called shearing. It is done by the machines similar to those used by barbers to remove hairs.

(iii) **Sericulture :-** The breeding and management of silk worms for the production of silk is known as sericulture. Different types of silk (e.g. mulberry silk, Tassar silk etc.) with different textures are obtained from different varieties of silk moths.

Q 5:

Given below is a sequence of steps in the processing of wool. Which are the missing steps? Add them.

Shearing, _____, sorting, _____, _____, _____.

Ans 5:

Shearing, **scouring,** sorting, **fibre spinning**, **fibre drying**, **rolling in silk yarn**.

Q 6:

Make sketches of the two stages in the life history of the silk moth which are directly related to the production of silk.

Ans 6:

Q 7:

Out of the following, which are the two terms related to silk production? Sericulture, floriculture, moriculture, apiculture and silviculture.

Hints: (i) Silk production involves cultivation of mulberry leaves and rearing silkworms.

(ii) Scientific name of mulberry is **Morus alba**.

Ans 7:

Sericulture and moriculture.

Q 8:

Match the words of Column I with those given in Column II:

Column I	**Column II**
1. Scouring	(a) Yields silk fibres
2. Mulberry leaves	(b) Wool yielding animal
3. Yak	(c) Food of silk worm
4. Cocoon	(d) Reeling (e) Cleaning sheared skin

Ans 8:

Column I	**Column II**
1. Scouring	(e) Cleaning sheared skin
2. Mulberry leaves	(c) Food of silk worm
3. Yak	(b) Wool yielding animal
4. Cocoon	(a) Yields silk fibres

Q 9:

Given below is a crossword puzzle based on this lesson. Use hints to fill in the blank spaces with letters that complete the words.

Down Across

(D) 1: Thorough washing (A) 1: Keeps warm

2: Animal fibre 2: Its leaves are eaten by silkworms

3: Long thread like structure 3: Hatches from egg of moth

Ans 9:
