Here we are providing Class 7 Social science Our Enviroment MCQs Chapter – 2 Inside our Earth because its very important for Class 7 students as we all know that every board exam question has MCQs so that students should practice these questions so that students can get good marks in board. **Class 7 Social science** Our Enviroment MCQs Chapter – 2 Inside our Earth is an extremely important and its also a year in which students learn the fundamentals of concepts that help them lay a solid foundation for their higher education. Here we are providing in Class 7 Social science Our Enviroment MCQs Chapter – 2 Inside our Earth 100+ questions so that students practice more and more. If you want class wise Notes Then **Click Here**

1. The innermost layer of the earth is

(a) Mantle

(b) Sima

(c) Crust

(d) Core

Ans-(d)

2. Where is the deepest mine in the world located?

(a) South America

(b) South Africa

(c) South India

(d) South Australia

Ans-(b)

3. Red fort is made up of

(a) Red sandstone

(b) Black sandstone

(c) Red marble

(d) Black marble

Ans-(a)

4. Gold, petroleum, and coal are examples of

(a) Rocks

(b) Minerals

(c) Fossils

(d) Energy

Ans-(b)

5. The depth of the deepest mine in South Africa is

(a) one km

(b) two km

(c) three km

(d) four km

Ans-(d)

6. ____ rocks are hard where ____ rocks are soft.

(a) sedimentary, lava

(b) sedimentary, magma

(c) sedimentary, igneous

(d) igneous, sedimentary

Ans-(d)

7. Rocks that contain fossils are

(a) Sedimentary rocks

(b) Metamorphic rocks

(c) Igneous rocks

(d) Coastal rocks

Ans-(a)

8. The upper most layer of the earth's surface is called

(a) the crust

(b) the brust

(c) the roads

(d) the forest

Ans-(a)

9. The thinnest layer of the earth is

(a) Crust

(b) Mantle

(c) Core

(d) Outer Core

Ans-(a)

10. The Deccan plateau is made up of:

(a) Clay

(b) Granite

(c) Basalt

(d) None of the above

Ans-(c)

11. The deepest mine in the world is in which country?

(a) Finland

(b) Australia

(c) South Africa

(d) Australia

Ans-(c)

12. The molten magma cools down deep inside the earth's crust. Solid rocks so formed are called

(a) Intrusive Sedimentary rocks

(b) Intrusive Metamorphic rocks

(c) Extrusive igneous rocks

(d) Intrusive igneous rocks

Ans-(d)

13. What is the volume of the earth's crust with respect to the total volume of the earth?

(a) 1 %

(b) 15 %

(c) 84 %

(d) 90 %

Ans-(a)

14.What is the radius of the earth?

(a) 3671 km

(b) 7163 km

(c) 6371 km

(d) 1736 km

Ans-(c)

15. The uppermost layer of the earth's surface is called?

(a) Core

(b) Mantle

(c) Crust

(d) Lithosphere

Ans-(c)

16. Lithosphere is

(a) Mantle

(b) Magma

(c) Core

(d) Crust

Ans-(d)

17. When the molten magma cools, it becomes solid. Rocks thus formed are called?

(a) Igneous rock

(b) Metamorphic rock

(c) Sedimentary rock

(d) None

Ans-(a)

18. Any natural mass of mineral matter that makes up the earth's crust is called a

(a) rock

(b) road

(c) sediment

(d) none of these

Ans-(a)

19. What is the thickness of the earth's crust on the continental mass?

(a) 5 km

(b) 35 km

(c) 2900 km

(d) 3500 km

Ans-(b)

20. The depth of deepest mine in South Africa is about:

(a) 3km

(b) 4km

(c) 5 km

(d) 6 km

Ans-(b)

21. When the molten lava comes to the earth's surface, it rapidly cools down and becomes solid. Rocks formed in such a way on the crust are called?

(a) Extrusive igneous rocks

(b) Intrusive igneous rocks

(c) Metamorphic rock

(d) Sedimentary rock

Ans-(a)

22. The sediments are transported and deposited by

(a) wind

(b) water

(c) wind and water

(d) none of these

Ans-(c)

23. Basalt rock is an example of which one of the following rock types?

(a) Extrusive igneous rocks

(b) Intrusive igneous rocks

(c) Metamorphic rock

(d) Sedimentary rock

Ans-(a)

24. What is the thickness of the earth's crust on the oceanic floors?

(a) 5 km

(b) 35 km

(c) 2900 km

(d) 3500 km

Ans-(a)

25. The innermost layer is the core is made of:

(a) Nickel and Iron

(b) Silica and Alumina

(c) Silica and magnesium

(d) a and b both

Ans-(a)

26. Which of the following is the thinnest of all layers of the earth?

(a) Core

(b) Mantle

(c) Crust

(d) Lithosphere

Ans-(c)

27. Which layer is having a radius of about 3500 km

(a) Sial

(b) Crust

(c) Outer core

(d) Mantle

Ans-(c)

28. The process of transformation of the rock from one form to another is known as

(a) road cycle

(b) food cycle

(c) rock cycle

(d) all of these

Ans-(c)

29. What is meaning of igneous?

(a) Air

(b) Water

(c) Lime

(d) Fire

Ans-(d)

30. Fossils are the remains of dead _____

(a) Plants

(b) Animals

(c) Both a and b

(d) None of the above

Ans-(c)

31. Which of the following are the main constituents of continental crust?

(a) Silica and magnesium

(b) Silica and alumina

(c) Nickel and ferrous

(d) oxygen and iron

Ans-(b)

32. Igneous and sedimentary rocks can change into:

(a) Intrusive igneous rocks

(b) Extrusive igneous rocks

(c) Metamorphic rocks

(d) Igneous rocks

Ans-(c)

33. Which rock is the molten magma made up of?

(a) Igneous

(b) Metamorphic

(c) Sedimentary

(d) None of these

Ans-(a)

34. Depth of mantle layer of the earth is:

(a) 2900 km

(b) 3000 km

(c) 3100km

(d) 3200 km

Ans-(a)

35. The remains of the dead plants and animals trapped in the layers of rocks are called

(a) Rocks

(b) Conventional

(c) Fossils

(d) Minerals

Ans-(c)

36. What is the latin term of Igneous?

(a) Ignis

(b) Sedimentum

(c) Metamorphose

(d) None of these

Ans-(a)

37. Which of the following are the main constituents of the core?

(a) Silica and magnesium

(b) Silica and alumina

(c) Nickel and ferrous

(d) oxygen and iron

Ans-(c)

38. In search for oil engineers have dug a hole about:

(a) 3km

(b) 4km

(c) 5 km

(d) 6 km

Ans-(d)

39. What is the thickness of the earth's mantle?

(a) 5 km

(b) 35 km

(c) 2900 km

(d) 3500 km

Ans-(c)

40. The Taj Mahal is made of

(a) White marble

(b) Black marble

(c) Red marble

(d) Yellow marble

Ans-(a)

41. Rocks which contain fossils are called

(a) metamorphic rocks

(b) igneous rocks

(c) core

(d) sedimentary rocks

Ans-(d)

42. Like an onion, the Earth is made up of several concentric layers (one inside the other). What is the uppermost layer of Earth called?

(a) Mantle

(b) Core

(c) Crust

(d) Magma

Ans-(c)

43. Igneous rocks are made when:

(a) The solid magma melts and it becomes solid

(b) The cool magma molten, it becomes solid

(c) The molten magma cools, it becomes solid

(d) Solid magma molten, it becomes solid

Ans-(c)

44. Sandstone is made from

(a) Grains of soil

(b) Grains of plants

(c) Grains of water

(d) Grains of sand

Ans-(d)

45. Igneous rocks are called primary rocks because:

(a) All the other rocks are formed from the igneous rocks.

(b) These are important for human beings.

(c) These rocks produce all the ailments.

(d) None of the above.

Ans-(a)

46. The main mineral constituents of the continental mass are

(a) Silica and alcohol

(b) Silver and alcohol

(c) Silver and alumina

(d) Silica and alumina

Ans-(d)

47. Which rocks are known as primary rocks?

(a) Igneous rocks

(b) Sedimentary rocks

(c) Metamorphic rocks

(d) None of these

Ans-(a)

48. Gold, Petroleum and Coal are the examples of what?

(a) Rock

(b) Fossils

(c) Minerals

(d) Core

Ans-(b)

49. The lightest of the materials are concentrated in this layer

(a) Crust

(b) Mantle

(c) Inner Core

(d) Outer Core

Ans-(a)

50. When magma from deep below forces its way up to earths surface, it is called

(a) Sand

(b) Marble

(c) Sediments

(d) Volcano

Ans-(d)

51. What is the percentage of the volume of the earth?

(a) 1

(b) 15

(c) 89

(d) 20

Ans-(a)

52. Thinnest layer of the earth is

(a) Crust

(b) Nife

(c) Core

(d) Mantle

Ans-(a)

53. What are the uses of rocks?

(a) Building materials

(b) As a source of metals

(c) Both a and b

(d) None of these

Ans-(c)

54. Which type of rocks is called primary rocks

(a) Fossils

(b) Igneous

(c) Metamorphic

(d) Sedimentary

Ans-(b)

55. Why earth is called a dynamic planet?

(a) Continuously undergoes changes

(b) Never change

(c) Is very large in size

(d) None of these

Ans-(a)

56. Rocks roll down, crack, and hit each other and are broken down into small fragments. These smaller particles are called

(a) Sediments

(b) Sand

(c) Piece

(d) Units

Ans-(a)

57. What is a rock?

(a) Natural mass of mineral

(b) Artificial mass

(c) Both a and b

(d) None of these

Ans-(a)

58. What is meaning of igneous?

(a) Air

(b) Water

(c) Lime

(d) Fire

Ans-(d)

59. There are three major types of rocks except

(a) Metamorphic rocks

(b) Sedimentary rocks

(c) Igneous rocks

(d) Mantle rocks

Ans-(d)

60. What are the layers of the earth?

(a) Crust

(b) Mantle

(c) Core

(d) All of the above

Ans-(d)

61. Silica and magnesium are the constituents of

(a) Rock

(b) Inner Core

(c) Outer Core

(d) Mantle

Ans-(d)

62. The rock which is made up of molten magma is

(a) Igneous

(b) Sedimentary

(c) Metamorphic

(d) lava

Ans-(a)

63. _____ minerals are found in the continental masses

(a) Silica and alumina

(b) Silica and magnesium

(c) Nickel and iron

(d) Silica and iron

Ans-(a)

64. What happens when igneous and sedimentary rocks go under heat and pressure

(a) They change into graphite

(b) They change into fossils

(c) They change into metamorphic rocks

(d) They change into minerals

Ans-(c)

65. The molten magma cools down deep inside the earth's crust. Solid rocks so formed are called

(a) Intrusive Sedimentary rocks

(b) Intrusive Metamorphic rocks

(c) Extrusive igneous rocks

(d) Intrusive igneous rocks

Ans-(d)
